Portcall Group

Yacht Carpentry Division

Nothing competes with the luxurious look and feel of superbly finished teak decks. PORTCALL CARPENTRY DIVISION builds its reputation on them. Through continuous development and systematical improvement we always install high quality teak decks.

If you are looking for a completely professional job we will send our highly qualified team of Carpenters to your Boat, make templates of your Deck then return to complete the installation.

It is always better to repair any problems on teak decks sooner than later, if problems are not taken care of they will lead to other failures and repairs are more time consuming and cost more. Leaking teak decks may let water into the sub deck or below the decks causing rot or mildew to ruin whatever is below.

Whether you wish to add teak decks to a vessel under construction or to repair, reseam or replace an existing deck PORTCALL CARPENTRY can assist you with your project.

We manufacture all our decking to enhance the look, pleasure and value of your yacht. The decking is available in straight or sprung planks to your specifications from solid vertical grained Burmese Teak. We supply both F.E.Q. and S.D.Q. quality. Our teak decking ensures a watertight fit with all seams and joints caulked with the finest materials in the industry. We can custom order for you any thickness or width of teak planking and the adhesives we use have been tested in both extreme hot and cold temperatures.

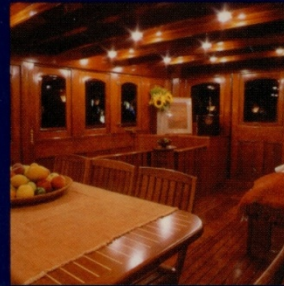

The teak we use comes from the tall deciduous tree of the Verbena family growing to a height of 30 metres and trunks measuring 1.5 metre diameter. These trees are found in the best hardwood areas of Indonesia. No other wood compares to teak when it comes to durability, elegance, stability and low maintenance.

All decks are custom fabricated to ensure a professional fit.

PORTCALL takes pride in the workmanship and customer service we offer by giving a two year guarantee accompanied with written insurance policy to all our projects. We also offer a free independent survey report.

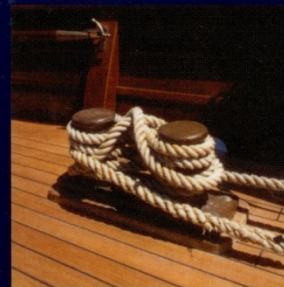

Our PORTCALL carpenters have built up experience and authority in the market of yachting for more than twenty years.

“We work late to give you an early summer”

We offer all carpentry work from Teak Decks, repairs and replacement of interior walls, down to bespoke cupboards and furniture. We are only a phone call away and would be pleased to give you a free quotation.

Our offices are situated in the very heart of the boat yard area in Palma, with workshops in El Arenal and new workshops planned in the Poligono De Marratxí. Therefore we are always very close to the work in progress.
